SHILOH STATION ROAD RECONSTRUCTION PROJECT UPDATE

Dear Resident:

The reconstruction of Shiloh Station Road north of Johnson Road is progressing well. The Contractor is scheduled to place lime down on the roadway on Friday, October 6, 2017 in order to create a solid base for the asphalt surface. This work will cause temporary closures of the road. Once the lime is in place, the road will be reopened to local traffic.

Approximately the week of October 16, 2017, the Contractor will begin to form and pour the curb and gutter. While this will be a great improvement to the road when everything is completed, this will cause some temporary inconvenience while the concrete is curing, as driveways will not be accessible during that time.

Please understand that all work is weather dependent and the schedule may be revised. If you have any questions about the work, please contact the Village of Shiloh at 618-632-1022 x118. We thank you for your cooperation and patience during the construction. Although inconveniences are expected, it is our goal to complete the work as efficiently as possible.

The Department of Public Works
Megan Fuhler, Director
