## *GENERAL RECYCLING TIPS*

- Buy recycled products.
- Reuse and Recycle whenever possible.
- Use reusable products rather than disposable (i.e. dinner plates vs. paper plates).
- Use reusable bags for all shopping.
- Buy in bulk. Large sizes deliver more product with less packaging waste and is usually more economical.
- Pack yourself or your children a waste free lunch. Put food in reusable containers rather than a disposable bag.
- Leave your grass clippings lie - don't bag them. As the clippings decay, they return important nutrients to the soil.
- Start a compost pile.
- Recycle paper - Support local school paper recycling programs.

## *Introduction*

Thank you for recycling! Your actions do make a difference. Making new products from recycled materials instead of virgin materials conserves natural resources, saves landfill space and reduces the pollution created in the manufacturing process. For example, by making new steel cans out of recycled material, energy use is reduced by 74%, air pollution by 85%, solid waste by 95% and water pollution by 76%.

Keep recycling working by purchasing products made from recycled materials. Contact the Office of Pollution Prevention at (618) 233-7769 for information on waste reduction and recycling for schools, businesses and homes, alternatives to leaf burning, air pollution, ozone alerts, reducing household hazardous waste, school education materials, classroom presentations etc.

**Visit [www.earth911.com](http://www.earth911.com) for more up to date and out of state or mail in recycling programs.**

## *Burning Restrictions*

Garbage collection services are offered throughout St. Clair County. The burning of household trash is a violation of the *Illinois Environmental Protection Act*.

Some municipalities and unincorporated St. Clair County allow burning of landscape waste. Contact your City or Village Hall for specific restrictions. Otherwise landscape waste may only be burned if all of the following conditions are present:

- It is burned on the site where generated
- It is burned when atmospheric conditions will readily dissipate contaminants
- Burning does not create a visibility hazard
- It is not burned in a municipality that has enacted ordinances which restrict or ban landscape waste burning

It is also illegal for any business to burn waste materials without an IEPA permit. Building contractors, landscapers and other businesses that generate wood and other easily combustible materials are often found violating this law.

## *SAVE ENERGY RECYCLE*

Did you know that when you recycle, you not only reduce the amount of waste going into the landfills, but you also save energy...and more. Here are some fun facts about energy and recycling.

- One pound of recycled steel saves enough energy to light a 60 watt incandescent bulb for 24 hours.....
- For every glass bottle recycled, we save enough energy to light a 100 watt incandescent bulb for four hours...or enough energy to light an equivalent 23 watt compact fluorescent lamp (CFL) for more than 16 hours!
- All of the materials recycled in Illinois each year save enough energy to provide heat and light for 400,000 Illinois homes.
- Recycling one ton of glass saves the equivalent in energy of 10 gallons of oil.
- Every ton of paper recycled saves enough energy to heat and air condition the average American home for at least six months.
- Recycling two aluminum cans saves the same amount of energy it takes to power a personal computer for one work day.
- Tossing away an aluminum can wastes as much energy as pouring out half that can's volume of gasoline.

## *Leaf Burning Alternatives*

- Mulch using a mulching lawn mower or spread out and mow over with a regular mower.
- Compost - leaves will be reduced in volume by 75% in a compost bin.
- Put leaves out for collection - call local city or trash hauler to find out how (your hauler may offer a special one month collection for leaves and other yard waste).
- Give leaves to a farmer or gardener.
- Take your yard waste to a local landscape waste disposal site (see above).

## *Light Bulbs (Fluorescent)*

Residential generators may dispose of spent fluorescent bulbs by using the landfill; however, the landfilling of spent fluorescent light bulbs, from non-residential generators, is an illegal activity. Non-residential generators as well as the landfill are subject to enforcement actions & future liability.

## *Medical/Insulin Needles*

If a person chooses to place this medical waste in with their trash, the following guidelines help protect the trash haulers, landfill workers, and others who may come in contact with the waste. First, the medical waste should be placed in a sturdy container such as a sharps container from the pharmacy, a laundry detergent bottle, or a soda bottle. When the container is full, the lid should be put on the container and taped in place. The container should then be marked "Do Not Recycle" and then placed in the regular trash.

- Also check with your doctor or local pharmacy for disposal.
- Look online for mail back programs. [www.earth911.com](http://www.earth911.com)
